SUMMARY

Frontend developer skilled in the JavaScript ecosystem, with experience building React/Next.js applications. Familiar with component architecture, state management, and API integration. Strong focus on responsive design, accessibility, and performance optimization, eager to apply these skills in an internship setting.

SKILLS

Languages: HTML, CSS, JavaScript, TypeScript

Frontend Frameworks: React, Next.js

Mobile Development: React Native

CSS Frameworks: Tailwind, Bootstrap

UI Libraries: Material UI, Chakra UI, Shad CN

Design Tools: Figma

Version Control: Git, Github

Backend Services: Firebase

PROFESSIONAL EXPERIENCE

Frontend Developer, OpenHealth (Internship) 🔗

April 2025 – June 2025

- Migrated the frontend codebase from Create React App (CRA) to Vite for faster builds and improved developer experience.
- Contributed to the development and revamp of OpenHealth's landing page and user dashboard.
- Built and integrated a responsive admin dashboard with real-time data using React.js and Tailwind CSS.
- Implemented a chatbot interface to improve user interaction and accessibility.
- Advised the team on UI/UX best practices and frontend security approaches to better protect user data.

Frontend Developer, Freelance

October 2024 – December 2024

- Developed custom web applications with React.js, Tailwind CSS, and JavaScript.
- Collaborated with clients, backend developers, and product designers to deliver tailored solutions.
- Managed full project lifecycle, from design to deployment and support.
- Maintained clear communication, providing updates and incorporating feedback.
- Demonstrated problem-solving and adaptability to meet client requirements and deadlines.

INTERESTS

- LeetCode

EDUCATION

BSc in Computer Science, University of Ibadan

August 2023 – present

- Strong foundation in algorithms, data structures, and software development.
- Hands-on experience with web technologies: HTML, CSS, JavaScript, React.js, and databases.
- Led teams in course projects.

PROJECTS

StreamVibe, Movie Platform 🔗

October 2024 – December 2024

- Developed a subscription-based movie platform offering a vast library of TV series, films, and anime.
- Designed responsive user interfaces using React.js and Tailwind CSS, ensuring compatibility with thousands of devices.
- Integrated Firebase for user authentication and real-time data management.

FutureTech, Modern Blogging Platform 🔗

- Developed a feature-rich blog platform using Next.js and Supabase for content management and user authentication.
- Implemented a clean and responsive UI with Tailwind CSS for optimal user experience across devices.
- Integrated dynamic content fetching, allowing users to read and post articles seamlessly.

Conova, Workspace Booking Platform 🔗

May 2025 – present

- Designed and developed the front end of Conova, a platform for booking shared workspaces, using React.js and Tailwind CSS.
- Integrated interactive components and responsive layouts to ensure seamless user experience across devices.
- Collaborated with backend developers to implement booking logic, availability calendars, and user authentication using Python.
- Conducted user interface testing and implemented UI improvements based on user feedback.

JurisSmart, AI Law Project (Hackathon) 🔗

September 2024

- Developed JurisSmart, a web app to assist users with complex legal matters, focusing on Intellectual Property law.
- Collaborated with backend developers to retrieve and display citation-backed information from legal sources across Nigeria, the USA, and the UK.
- Worked with product designers and backend developers to create a clean, intuitive interface using React.js, JavaScript, and CSS.
